

HOW TO PROVIDE ARTWORK WITH BLEED DL EXAMPLE

- All files need to be provided with minimum 2.5mm bleed around each edge to allow for trimming.
- For a standard finished DL Flyer of 210mm x 99mm, the file needs to be provided at 215mm x 104mm.
- Make sure to keep your text and important images a further 3mm in from the finished cut edge.

FILE PREPARATION & PREFERRED FILE FORMAT

A PRESS READY PDF file needs to have:

- All fonts converted to outlines.
- Any Images used in the artwork should be provided at 300dpi & CMYK.
- No crop marks - just let us know the finished print size.
- Artwork **MUST NOT** be provided in RBG
